## (PERMIT TERMS CONTINUED)

The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies, and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

Any water obtained under Permits 54247, 54759, 54760, 54761, 54762, 54763, 54764, 54873-T, 55547-T and 55548-T as a result of the dewatering program by the permittee shall be used first for mining, milling, heap leaching, drilling, road water and other related mining and milling uses within the places of use as described.

Any excess water from the dewatering program not utilized for mining and milling purposes must be disposed of in a manner approved by the State Engineer.

A monitoring plan must be submitted to the State Engineer for approval prior to any dewatering or within 30 days from the issuance of this permit.

A monthly report shall be submitted to the State Engineer within 10 days from the end of the month which shall include the amount of water pumped from each well, the amount of water used for mining and milling purposes, and all measurements required in the approved monitoring plan.

The State Engineer retains the right to regulate the pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on March 18, 1992 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
